Phaser 8500 / 8550 Colour Printers

Feature-packed, at an unbeatable price

Think you can't afford high performance features? Think again. These printers come with more features for less.

- Want speed? You've got it. The Phaser 8550 printer is so fast you can expect up to 30ppm in full colour. Or choose the Phaser 8500 printer for up to 24ppm in colour.
- Industry leading speed. As fast as 5 seconds until your first page out on the Phaser 8550, and as fast as 6 seconds on the Phaser 8500. That's three times faster than most competitors.
- Features that are optional on competitors' products come standard. Namely, networking, true Adobe® Postscript® 3™, automated troubleshooting and job accounting. Plus, on the Phaser 8550 you get advanced paper handling features such as automatic 2-sided printing, collation and booklet printing.
- Built with large paper trays so you can get the large print jobs done without interruption.
- A robust duty cycle delivers the reliability you need in a busy workgroup.

Colour on the cutting edge. Want your business to be bolder, brighter, more efficient and environmentally friendly? The Phaser 8500/8550 printers are for you. Solid ink not only gives you brilliant colour fast, but it is also the world's most environmentally friendly workgroup colour printer technology: ozone friendly with a huge reduction in consumables waste, recyclable packaging, Energy Star and Intelligent Ready all in the one package.

Incomparable quality

Stand out from the corporate crowd with colour that makes an impact. Whether you're printing reports and presentations or graphics and web pages, solid ink colour is so lush and vibrant, it turns heads.

- Solid ink provides superior print quality on a wide range of media types and weights – from recycled to cover stocks, to transparencies and more.
- Expect colour that's truer, more saturated and remarkably consistent.
- 2400 FinePoint™ image enhancement technology on the Phaser 8550 provides the ultimate in print quality.

Colour controls get you the brilliant results you want. They ensure that your colour is optimised and that your printout accurately reflects what you see on screen.

Sophisticated simplicity

Sometimes it's the little things, like loading ink, that slow you down. Not with the Phaser 8500 / 8550 printers. They are designed to make office life more efficient.

Easy for users

- Compact, no-mess ink sticks are as easy to load as a stapler. You can drop them into their slots at any time.
- Run out of colour ink? No problem. You can continue to print in black-only mode if you prefer.
- You can keep a personal mailbox on the printer's hard drive (optional on Phaser 8550 only). So if you're late for a meeting and need an extra copy of something you've printed, just walk up to the printer, select the stored job and hit "print".
- These printers keep track of your printing habits. The Intelligent Ready feature learns when you print most and warms up or enters power-saving mode accordingly.
- There's no training required. An internet-based automated support system provides help when you need it. Plus, the Support Centre utility provides quick access to all the user documentation, tools and utilities that come with the printer.

Simple for administrators

- Installation made easy. It's out-of-the-box and on your network in just four steps.
- Off-site? Fuji Xerox Printers keeps you in the loop. A built-in web server allows you to manage, configure and troubleshoot printers from anywhere using a web browser.
- Enjoy quick desktop access to printer and job status, email alerts, simplified printer installation and network administration.
- Keep tabs on office activity. The Usage Analysis Tool enables you to collect, organise and analyse job accounting data.

Superior design and ease of use

- 1 Use 100-sheet Tray 1 for heavy paper up to 220gsm cover, business cards, envelopes, transparencies and more.
- 2 Standard 525-sheet Tray 2 feeds up to 120gsm bond.
- 3 4 Add one or two 525-sheet high-capacity paper feeders to boost your capacity to as much as 1,675 sheets.
